Business Price Index

Abstract

From the March 2015 quarter, the producers price index (PPI) and capital goods price index (CGPI) information releases are together in an integrated quarterly business price index (BPI) information release.

The BPI release includes the PPI, CGPI, and farm expenses price index (FEPI).

The PPI measures changes in prices of outputs that generate operating income and inputs that incur operating expense.

The CGPI estimates the overall price change in physical assets that the productive sector acquires or builds.

The FEPI measures price change for fixed inputs of goods and services to the farming industry.

Frequency

3 Quarterly

Main users of the data

Statistics New Zealand National Accounts, The Reserve Bank of New Zealand, The Treasury

Significant events impacting this study series

March Quarter 2011 - ANZSIC06 industry classification system was implemented

March Quarter 2015 - The producer's price index (PPI), the capital goods price index (CGPI), and the farm expenses price index (FEPI) started to be released together in an integrated quarterly business price index (BPI) release
